CONTENTS

SEPARATION TECHNIQUES IN NUCLEIC ACID RESEARCH

Foreword
by Z. Deyl and J. Skoda (Prague, Czech Republic) 1

Reversed-phase and ion-pair separations of nucleotides, nucleosides and nucleobases: analysis of biological samples in health and disease
by A. Werner (Basle, Switzerland) 3

Reversed-phase high-performance liquid chromatography of purine compounds for investigation of biomedical problems: application to different tissues and body fluids
by T. Grune and W. G. Siems (Berlin, Germany) 15

Prediction of the behaviour of oligonucleotides in high-performance liquid chromatography and capillary electrophoresis
by Y. Baba (Kobe, Japan) 41

Isotachophoresis of nucleic acid constituents
by G. Bruchelt, D. Niethammer and K. H. Schmidt (Tübingen, Germany) 57

Comparison of properties of agarose for electrophoresis of DNA
by P. Upcroft and J. A. Upcroft (Herston, Australia) 79

Methods for recovering nucleic acid fragments from agarose gels
by G. Duro, V. Izzo and R. Barbieri (Palermo, Italy) 95

Non-radioactive detection methods for nucleic acids separated by electrophoresis
by K. Düring (Hamburg, Germany) 105

Southern and Northern analysis
by R. A. Kroczek (Berlin, Germany) 133

Activity gel and activity blotting methods for detecting DNA-modifying (repair) enzymes
by S. Seki, K. Akiyama, S. Watanabe and K. Tsutsui (Okayama, Japan) 147

Checking of individuality by DNA profiling
by R. Brdička (Prague, Czech Republic) and P. Nürnberg (Berlin, Germany) 167

Quantitative analysis of enzymic digests of DNA using gel electrophoresis
by E. A. Ribeiro (Hercules, CA, USA) 181

Size-dependent chromatographic separation of nucleic acids
by K.-i. Kasai (Kanagawa, Japan) 203

Field alternation gel electrophoresis — status quo
by K. M. Townsend and H. J. S. Dawkins (Nedlands, Australia) 223

Application of high-performance liquid chromatography for recognition of covalent nucleic acid modification with anticancer drugs
by J. Cummings, R. C. French and J. F. Smyth (Edinburgh, UK) 251

Electrophoretic and chromatographic separation methods used to reveal interstrand crosslinking of nucleic acids
by J. A. Hartley, R. L. Souhami and M. D. Beradini (London, UK) 277

Methods used for analyses of "environmentally" damaged nucleic acids
by K. Frenkel and C. B. Klein (New York, NY, USA) 289

Affinity chromatography with nucleic acid polymers
by H. W. Jarrett (Memphis, TN, USA) 315

Author Index 341

List of Compounds Chromatographed 343
